

Reporting my accounts in AWS

End User Report

This document is the property of TD SYNnex and can only be used by the intended recipients.
Any unauthorized use, distribution, reproduction, or modification of this document or its contents is strictly prohibited.

What is End User Report and what is it for?

- It is the account declaration system for AWS
- It is the tool that helps recognize accounts, their respective segment, geographical location, and subsequent application to other discounts for consumption development

The screenshot shows the AWS End User Report interface. At the top, it says "End user information (25 out of 500, Total: 767)" and "Results displayed are limited to 500 rows". The AWS logo is prominently displayed. Below the header, there is a search bar with the placeholder text "Find by Management Account ID, AWS account ID, name, or email". To the right of the search bar are two buttons: "Records not reported" and "Filter". Below these buttons, a green arrow points to a dropdown menu that currently shows "Records not reported". The main part of the interface is a table with the following columns: "Management account", "AWS account ID", "AWS account name", "Email", and "Usage type". The first row of data shows the Management account as "5391", the AWS account ID as "99", and the Usage type as "com.mx".

Management account	AWS account ID	AWS account name	Email	Usage type
5391	99			com.mx

What is End User Report and what is it for?

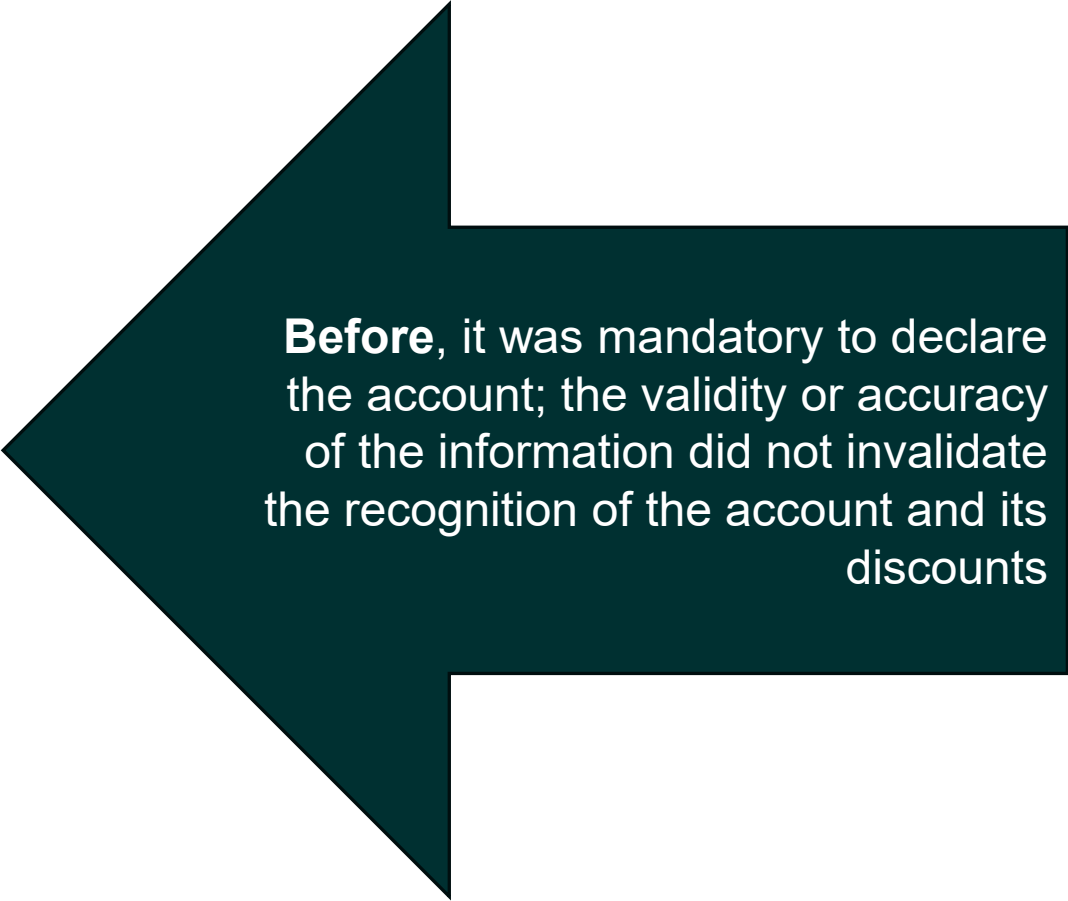

- Each distributor must enter all new accounts in this report to be recognized
- The information must be accurate for the account to qualify for the corresponding discounts

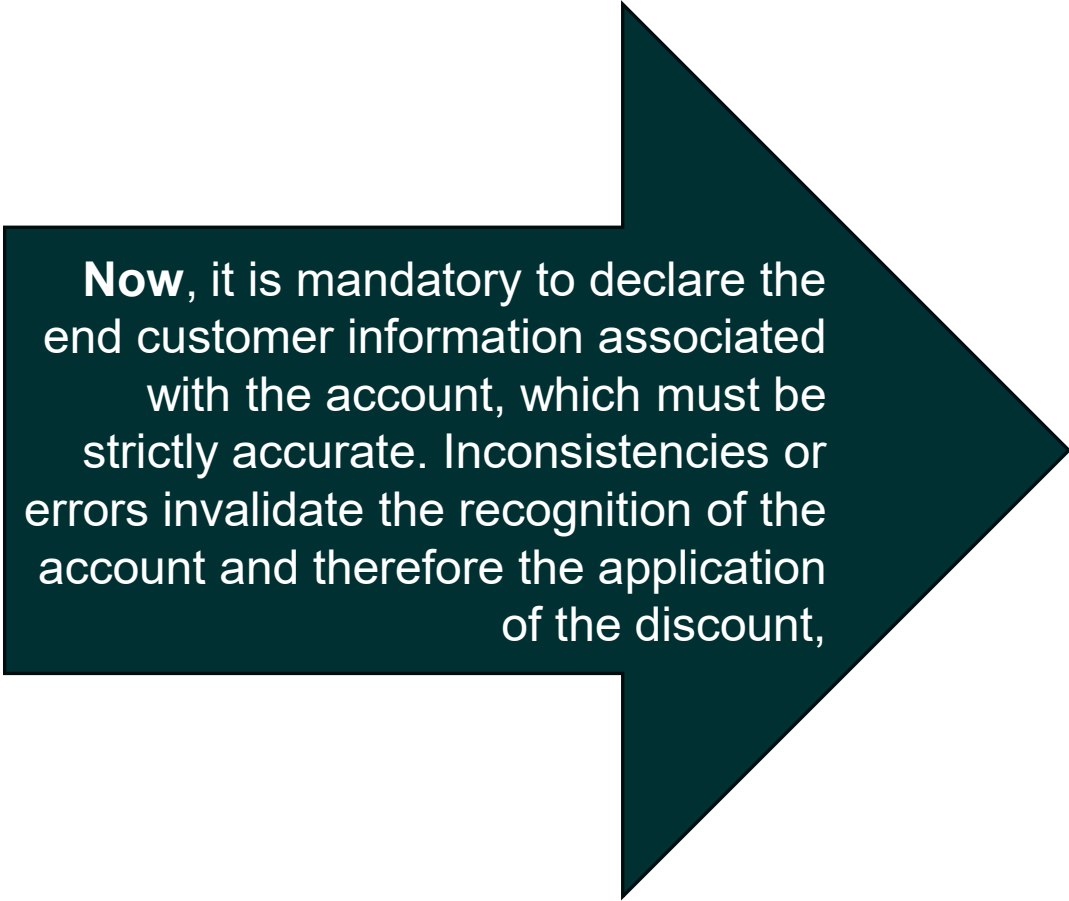

The screenshot shows the 'End user information' form in the AWS console. At the top left is the text 'End user information' and the AWS logo. At the top right are 'Cancel' and 'Save' buttons. Below is a table with the following columns: Usage type, End customer legal name, Domain name, End customer city, End customer state/province, End customer zip code, and End customer country. The 'Usage type' column has a dropdown menu with options: 'Select values' (with an up arrow), 'Unknown', 'End User', and 'Internal'. The other columns have text input fields. The 'End customer country' column has a dropdown menu with 'Select values' and a down arrow.

Usage type	End customer legal name	Domain name	End customer city	End customer state/province	End customer zip code	End customer country
Select values ▲						Select values ▼
Unknown						Select values ▼
End User						Select values ▼
Internal						Select values ▼

What changed?

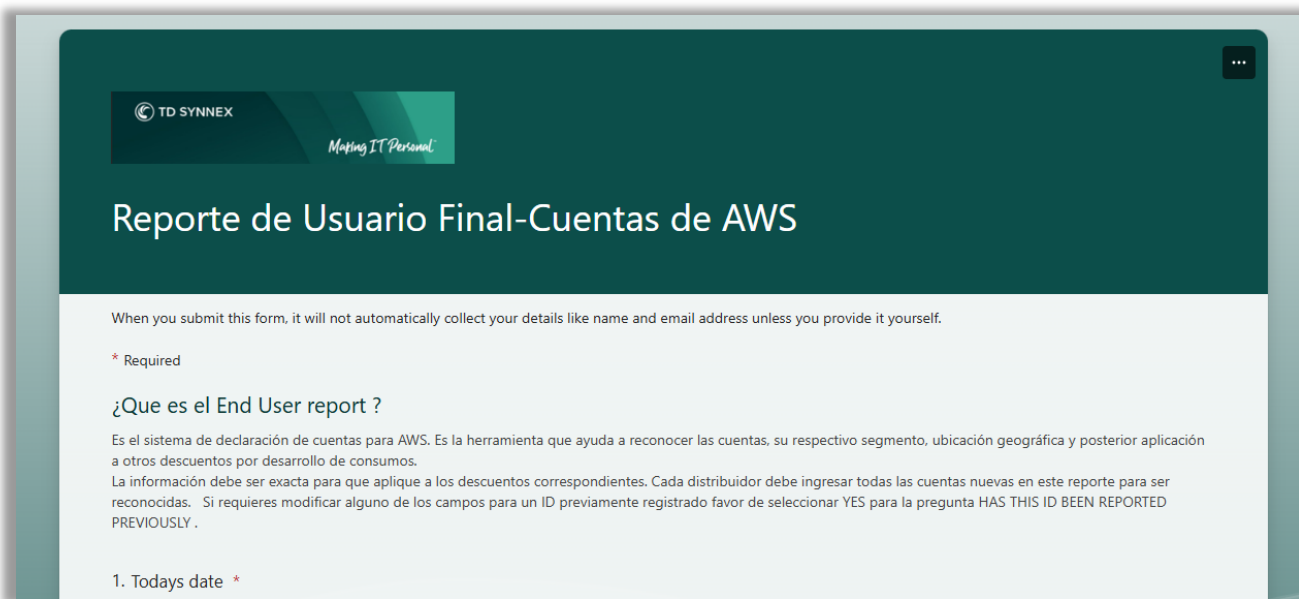

Before, it was mandatory to declare the account; the validity or accuracy of the information did not invalidate the recognition of the account and its discounts

Now, it is mandatory to declare the end customer information associated with the account, which must be strictly accurate. Inconsistencies or errors invalidate the recognition of the account and therefore the application of the discount,

What can I do?

- For your convenience, with each account delivery, we will be sharing a link where you can fill in the necessary information and thus mutually support the recognition of accounts and discounts

What can I do?

- For AWS, it is crucial to differentiate between the **public sector** and the **commercial sector**. The term "public sector" is not limited solely to government entities, but encompasses a variety of clients that offer **community services**, such as both public and private educational institutions, cooperatives, compensation funds, among others.

☐ Yes

☐ No

14. Advising Government *

☐ Yes

☐ No

Cliente de Gobierno? (Government Customer) *

Indicar si es Gobierno (Sí o No): Un cliente gobierno está definido como cualquier agencia gubernamental, institución pública, o entidades con participación estatal.

"Usuario Final del Sector Gobierno" significa cuando el Usuario Final es una agencia, organización u otra entidad que se encuentra dentro de (o mayoritariamente de propiedad de, controlada, fundada o administrada por:

- a) Las divisiones del poder ejecutivo, legislativo o judicial de un gobierno (Federal, estatal, municipal o local);
- b) Una entidad cuasi-gubernamental (por ejemplo, el Banco Mundial);
- c) Una entidad gubernamental / regulatoria internacional (por ejemplo, una institución de la Unión Europea)
- d) Una institución pública (por ejemplo, una escuela, universidad u hospital); o
- e) Contratistas de un gobierno, consultor u otra entidad que trabaje como soporte de lo antes descrito.

Indicate Government Customer: (Yes or No): A government customer is defined as a Government Agency, Publicly Funded Institution, or Government-Owned Entity (State, Local, or Federal)

Government Customers are defined as any agency, organization or other entity that is within or substantially owned, funded, managed or controlled by:

- a) The executive, legislative or judicial branches of government within the US, its territories, or of any other country's government at any level;
- b) A quasi-governmental entity (e.g., the World Bank or a government-owned corporation)
- c) An international governing/regulatory body (e.g., an EU institution)
- d) Publicly funded institution (e.g., a college, university or hospital) OR
- e) Higher tier prime contractor, consultant or entity working in support of the foregoing

Asesor para la compra de tecnología AWS en el Cliente de Gobierno? (Advising Government) *

Advising Government: (Yes or No): Provides advice or recommendations regarding the End Customer's procurement of information technology services or selection of information technology providers, and such advice or recommendations could potentially relate to AWS services.

Ineligible Public Sector Program Accounts: You are not eligible to receive the Partner Originated Discount (POD) or Partner Growth Rebate (PGR) for any Program Account resold to a Public Sector End Customer with which you have an agreement to provide advice or recommendations regarding information technology services or provides, and such advice or recommendations could potentially relate to AWS Services. For you to receive the POD or PGR, TD SYNnex may require you to certify (in form and manner specified by AWS and TD SYNnex from time to time) that Program Account are not subject to the foregoing exclusion or that you otherwise are in compliance with the ADENDA ESPECÍFICA DE CSR:AWS.
